

Phase 1

Product Requirements Document (PRD)

This is our first official document.

It answers:

- Why are we building TalentAI?
- Who are the users?
- What problem are we solving?
- What are the features?
- What are the priorities?
- What is Version 1?
- What is Version 2?
- Success metrics
- Risks

Think of it as the product manager's document.

Phase 2

Software Requirement Specification (SRS)

This becomes our software contract.

It contains

Every screen

Every button

Every validation

Every API

Every workflow

Every requirement

Nothing is left to assumptions.

Phase 3

High Level Design (HLD)

Big picture.

Example

Browser

Frontend

API

Business Layer

Database

AI

Storage

Everything is connected.

Phase 4

Low Level Design (LLD)

Every class.

Every interface.

Every service.

Every repository.

Every package.

Every DTO.

Every mapper.

Everything.

Phase 5

Database Design

Not just

Users table.

Instead

Every column

Every index

Every constraint

Every relationship

Every trigger (if needed)

Every audit field

Everything.

Phase 6

API Design

Before coding.

Every endpoint.

Example

POST /api/v1/auth/login

Request

Response

Validation

Error Codes

Headers

Rate Limit

Authentication

Everything.

Phase 7

UI Design

Every screen.

Desktop

Tablet

Mobile

Loading

Empty State

Error State

Dark Mode

Light Mode

Everything.

Phase 8

AI Design

Probably the most important part.

Instead of saying

AI Resume Analysis

We'll design

Upload Resume

↓

Storage

↓

Resume Parser

Skill Extractor

Experience Extractor

ATS Engine

Embedding

Vector DB

AI Analysis

Suggestions

Frontend

Every step.

Phase 9

Security Design

Authentication

Authorization

JWT

Refresh Token

Permissions

Encryption

File Validation

Audit Logs

Rate Limiting

Password Policies

Everything.

Phase 10

Development Standards

This is something almost nobody does.

We will define

Naming Convention

Folder Convention

Git Convention

API Convention

Error Convention

Logging Convention

Documentation Convention

Testing Convention

Commit Convention

Everything.

Phase 11

GitHub Strategy

Repository

Branches

Main

Develop

Feature

Bugfix

Release

README

Wiki

Projects

Milestones

Labels

Everything.

Phase 12

Development

Only now.

We finally write code.
